

# What Is Youth Alive?—Leader Edition

Youth Alive was launched in 1979 as a campus ministry to present Jesus Christ to every student on every campus. Youth Alive strives to challenge students to adopt a personal plan of action for their faith and establish or assist ongoing campus ministry for every junior high and high school campus.

Youth Alive operates on the campus as a multi-denominational, multi-church based ministry. It seeks to maintain an open forum for all denominations and bridge a gap between students and the local church.

## PRAYER

With Youth Alive everything begins with prayer. Prayer Zone Partners gives both students and adults the opportunity to have tangible ownership in youth ministry. By enlisting concerned youth and adults to turn school zones into prayer zones, we create an immediate intercessory prayer cover for our young people as they work on the front lines to make a difference in the lives of their classmates.

Pray for students and adults to have a passion for effective campus ministry. Visit <[www.prayerzonepartners.com](http://www.prayerzonepartners.com)> to learn more about raising up intercessors in your area.

## EMPOWERMENT

Students reaching students is what youth ministry is all about. Our young people are our single greatest resource for the success of any outreach we endeavor. Empowering students to become campus missionaries helps enable them to accept personal responsibility to reach the lost of their generation. By making campus missions a priority, we help our students not only live out their faith today, but develop a deeper ownership for their beliefs that will last later in life.

Become a CM coach and train students who commit to be a missionary to their campus. See the *campus missionary\_digisource* V.3 from Youth Alive for extensive training and leadership material.

## NETWORKING

Youth Alive campus clubs bring Christian students from different church backgrounds together with one primary mission: campus ministry. By networking with other students, the Christian campus club becomes a staging platform for ministry, a meeting place for our young people to draw strength from each other and strategize together on how to reach their campus.

Help students start a Christian club and/or commit to coach an existing campus club to help it reach its potential.

## OUTREACH

The Seven Project is not your normal outreach; it is the event that comes to your city and never leaves. The Seven Project is not merely a school assembly or evening rally. The Seven Project is a comprehensive outreach strategy that equips and trains leaders and students on effective evangelism and follow-up. By utilizing the backbone of any youth outreach—our campus missionaries—and by networking with local church leaders and students, The Seven Project lays the groundwork for lasting change in the community.

Consider bringing a high impact, community-wide outreach, like The Seven Project to your local campus. Visit [www.thesevenproject.com](http://www.thesevenproject.com) for more information.
